

Visser Shipping System

Simplifying the complexity!

Shipping your product is the final step before it reaches the customer. Inaccuracies with order picking, labour costs, and getting orders out the door on time are only a few of the challenges growers face day to day. Visser has the experience and knowhow to design a shipping system catered to each grower's needs.

The advantages of this system are:

- ✓ In house programming allows for customised software for each system.
- ✓ Sorting by variety, color, height, etc.
- ✓ Complete solution provider from loading, unloading, watering, scanning, labelling, sorting, palletising, rack loading.
- ✓ Complex shipping situations made simple.
- ✓ Space saving designs.
- ✓ High speed and reliability.
- ✓ Experienced service and support for the entire system, not just a few components.
- ✓ Complete system designed, engineered and built by Visser and approved partners which means one call for support on the entire system.
- ✓ Each shipping system is designed for future expansion and changes in future.

Visser Shipping System

Simplifying the complexity!

Tracking & Tracing your product:

Barcodes, QR codes, or a virtual label. Visser is capable of sorting products using several methods to sort your products and get the orders right.

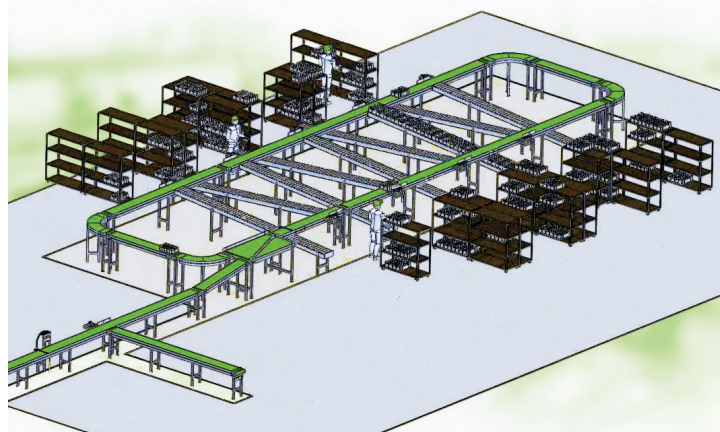

Speed & Accuracy:

500-5000 trays or boxes per hour Visser can design and build a system that can get the sorting and shipping done on time and keep orders accurate.

Service and support:

Visser designs, engineers and builds everything in-house. When issues come up our own technicians and programmers can solve it quickly to get you back up and running.

A Visser Shipping System is the answer to your shipping challenges. Please contact our sales team to discuss your needs.
