Template Filler 900

"Compact template filling machine"

The Template Filler 900 is a unique template based filling machine which gives you a nice and clean filling result. By using a template that matches the tray format, the soil ends up in the pot or the cell of the tray. No soil is spilled in the process.

The trays are collected on a conveyor belt which is being pushed upwards to the template to avoid any spillage. An integrated brush, which is mounted at the filling head cleans the top of the pot. By changing the number of filling cycles the soil compactness can easily be changed.

Why choose the Template Filler 900?

- ✓ Clean filling result.
- ✓ No waste of soil.
- ✓ Capacity of 750 trays/hour.

“

A clean result.

”

Template Filler 900

"Compact template filling machine"

Options

- Extra filling template.
- Brush unit for cleaning the top of the tray.

Features

- Clean filling result.
- No waste of soil.
- Easy to change soil compactness.
- Easy to change to a different tray size by changing the template.
- Output of 750 trays (based on a tray of 540 x 310LSL) per hour can be achieved, depending on:
 - Tray size.
 - Soil compactness.
 - Length of the filling machine.
- Easily integrated in new or existing production systems.

Technical specifications

Dimensions L x W x H	2,800 x 1,640 x 2,200mm
Maximum template dimensions	950 x 600 x 200mm
Total air consumption	150 litre per minute
Total kVA	6,9 kVA
Content soil hopper	1000 ltr.
Capacity guidelines	Output of 750 trays (based on a tray of 540 x 310mm LSL) per hour can be achieved, depending on tray size, soil compactness and filling machine length.
